

Iridium Extreme 9575 Satellite Phone

Iridium Extreme 9575 from Network Innovations is a ruggedized satellite phone for use in harsh operating conditions, with global coverage, pole to pole. With real time GPS tracking and SOS, the Extreme is the first phone with military-grade 810F durability. It is dust proof, shock and jet-water resistant. Iridium Extreme is built for the world's toughest, highest usage customers to make the connections that matter under the harshest conditions, anywhere on the planet.

FEATURES

Iridium's most compact handset to date, Iridium Extreme is enhanced with more features than ever.

- Compact physical footprint for streamlined portability
- Intuitive user interface for out-of-the-box ease of use
- Water, shock and dust resistance for unparalleled durability, IP65 Ingress Protection
- Enhanced SMS and email messaging capability
- Integrated speakerphone, Headset and hands-free capability
- Internally stowed, rugged, high-gain antenna
- Mini-USB data port
- Military-grade durability (MIL-STD 810F)
- Supports Online Tracking services

Like other Iridium satellite phones, Iridium Extreme delivers exceptional voice and data capability including SMS and data tethering. It builds on these features by incorporating enhanced, fully integrated GPS and online tracking services and emergency options – including the first-ever built-in programmable one-touch SOS button with customized location notification – for added security.

Iridium Extreme is built with the highest standards of military durability, achieving an 810F rating, and scores the highest rating of Ingress Protection in the industry at IP65. Designed with a high-gain, rugged antenna and a diamond treaded, tapered grip for the best in-hand ergonomics of any phone on the market, Iridium Extreme is jet-water resistant, dust proof and shock resistant — ensuring an uncompromised connection, under virtually any circumstances.

Iridium Extreme offers location-based real time tracking to increase business efficiencies, improve military and emergency response, track critical assets or simply keep family and friends up to date. Iridium Extreme also supports Google Mapping through coordinate sharing, allowing users, employers, friends and family to visually track the phone location.

IRIDIUM AIRTIME PLANS

Standard Post Paid

The Standard Post Paid plan is ideal for the casual user or emergency backup applications where usage is infrequent. The subscriber pays a low monthly fee for system access and then all other billing is usage based per minute.

Standard Pre-Paid

Standard Pre-Paid is for those who use their phone on a regular basis and can take advantage of the lower costs of prepaid plans or for seasonal users who don't want the monthly fees of the Post Paid plan. Standard Pre-Paid SIMs are available from 75 to 5,000 minutes.

Northern Lights Pre-Paid

The Northern Lights plan is only applicable for those who will use their Iridium phone exclusively within Canada or Alaska. The Northern Lights plan provides a cost effective prepaid option whereby minutes can be added in 200 minute increments with 6 month validity.

Iridium 2-Stage Calling

The 2-stage access provides a cost effective way for people to reach you on your Iridium phone. The caller pays regular long distance fees to Arizona and the Iridium subscriber pays for the satellite portion of the call.

+1 Access Service

The +1 Access Service is a single phone number that people dial to contact you. The caller pays for the portion of the call to the Arizona and then the Iridium subscriber pays for the satellite portion of the call.

ABOUT NETWORK INNOVATIONS

Network Innovations is recognized as a world leader in the delivery of reliable, cost-effective satellite telecom solutions to our clients wherever their business may take them on the planet.
